Below are two options to replace the failed Identification System.

Currently there are 2 different access control systems running the Government Center Building. The older system was installed when the building was built and is no longer being manufactured in its current state. The newer system runs about half the doors and the server is large enough to handle the remaining doors on the old systems (ATS sized it initially to handle the entire county if desired).

Option 1 – Migrate all existing doors to the existing S2 Access Control system which handles the cameras and panic alarms. **\$93,954.23 Q23939**

Pros –

- County Personnel could use single badge from all County locations (Jail,Gvt Center)
- Total integration into existing system running new doors at Gvt.
- County could add doors to any building and administer from single point (Jail or Gvt Center or Both)
- Badging and New Printer included

Cons –

- Price (But best long term)

Option 2 - Migrate only failed ID portion of existing system to existing access Control Panel leaving physical doors operating. (Staff would still enter info into 2 systems) **\$3,431.77 Q24035**

Pros –

- Price

Cons –

- About half the Physical doors still on old system
